- PROFESSIONAL EXPERIENCE
- Capstone Project – BigBrew E-Commerce Platform | 2024–2025

First Uniting Christian School

 - Developed a full stack e-commerce web platform for BigBrew using HTML, CSS, JavaScript, PHP, and MySQL (XAMPP), following the Waterfall Model development methodology
 - Collaborated with a team of 9 researchers to design and implement key features including secure user authentication, mobile-responsive design, an admin dashboard for product and order management, and an integrated payment and checkout system
 - Conducted requirements analysis, system design, testing, and deployment to address real business challenges such as manual inventory inefficiency and limited online visibility
 - Successfully presented the fully functional platform to panel judges, demonstrating improvements in order processing, customer engagement, and inventory management workflows
- Junior Web Developer | 2025 – Present

Krono Property Management

 - Redesigning and modernizing the company's existing website using HTML, CSS, and JavaScript to improve overall user experience and visual appeal
 - Independently managing the full redesign process including layout planning, UI improvements, and front-end development
 - Collaborating directly with the client to ensure the website meets business needs and brand standards

- EDUCATION
- First Uniting Christian School | 2024–2025

Senior High School – ICT Strand
